

Package ‘minfiData’

April 8, 2015

Version 0.7.1

Title Example data for the Illumina Methylation 450k array

Description Data from 6 samples across 2 groups from 450k methylation arrays

Author Kasper Daniel Hansen, Martin Aryee, Winston Timp

Maintainer Kasper Daniel Hansen <khansen@jhsp.h.edu>

License Artistic-2.0

Index	3

MsetEx	<i>An example dataset for Illumina’s Human Methylation 450k dataset, after preprocessing.</i>
--------	---

Description

This contains the raw data for 6 samples from Illumina’s Human Methylation 450k dataset. The data has been preprocessed.

Usage

```
data(MsetEx)
```

Format

An object of class "MethylSet"

Details

Currently, the pheno data for these 6 samples are masked. Scripts for creating the object is found in the scripts directory of the package and extdata contains the IDAT files. The data has been preprocessed using preprocessRaw.

See Also

[MethylSet](#) for the class definition, [preprocessRaw](#) for the preprocessing function, [RGsetEx](#) for the companion raw data.

Examples

```
data(MsetEx)
pData(MsetEx)
```

RGsetEx

An example dataset for Illumina's Human Methylation 450k dataset.

Description

This contains the raw data for 6 samples from Illumina's Human Methylation 450k dataset.

Usage

```
data(RGsetEx)
```

Format

An object of class "RGChannelSet"

Details

Currently, the pheno data for these 6 samples are masked. Scripts for creating the object is found in the scripts directory of the package and extdata contains the IDAT files.

See Also

[RGChannelSet](#) for the class definition, [MsetEx](#) for the companion preprocessed data.

Examples

```
data(RGsetEx)
pData(RGsetEx)
```
