**Description**

This `AffyBatch-class` object represents part of a dilution experiment dataset.

**Usage**

```
data(Dilution)
```

**Format**

An `AffyBatch-class` object containing 4 arrays.

**Source**

Two sources of cRNA A (human liver tissue) and B (Central Nervous System cell line) have been hybridized to human array (HGU95A) in a range of proportions and dilutions. This data set is taken from arrays hybridized to source A at 10.0 and 20  $\mu\text{g}$ . We have two replicate arrays for each generated cRNA. Three scanners have been used in this study. Each array replicate was processed in a different scanner.
